

## The perfect pumping unit!

Just imagine that you can now install a **WindPorts** right at the source! You will finally be able to irrigate your fields, water back marshes or fill up a container for future usage. Whether your needs are 5, 10 or even 20kW, this is the unit that you require.

The **WindPorts** unit will supply water where conventional energies are either too expensive or just unavailable

Using a vertical axis unit supply more energy with a direct drive to a mechanical pumping unit.
